

EASY AS 1-2-3

FOUNDATION & STRUCTURAL REPAIR:

We use a patented helical piercing system for a ROCK SOLID repair.

CARBON FIBER REINFORCEMENT:

Carbon Fiber can be bonded to a concrete or masonry surface to stop bowing and cracking which adds strength and provides optimum reinforcement.

EPOXY INJECTION:

Rock Solid offers an effective way to repair those cracked & leaky concrete walls.

At ROCK SOLID
we professionally repair &
restore your concrete
& masonry problems!

Concrete Leveling:
Using our professional system we
can put your concrete back on
the level saving you time and money.

DON'T pay the expense of tearing
out and replacement.
Or for concrete that does not match
the original.

Call ROCK SOLID today!
We'll repair your sinking con-
crete! PLUS it's ready to use the
SAME DAY!
